Dear Sirs, I urge you to oppose NAB's petition 04-160 as I have chosen to switch to subscription radio and no longer listen to broadcast radio. The same way I have chosen cable over broadcast TV. I live in Phoenix and drive Semi's. In the citys where I often drive, it is essential to be able to get up to date info on traffic delays and weather for scheduling and routing. Tell NAB to learn how to improve the programming and they will pick up some more listeners. I can hear what I want, when I want with XM radio.

Thank you, Dale Spencer
